Message From Chairperson

At the very outset, I take this opportunity to thank all the front-line workers and the field staff who worked during the Covid-19 crisis which cast a dark shadow over the whole of 2020 and also 2021. On behalf of the Board let me start by saying that our thoughts go out to all those who have suffered from the effects of this terrible pandemic.

The staff and field team were engaged by way of Virtual meetings which were set during the complete lockdown. We discussed many topics, taken their opinions as how they feel about issues important to them through open discussion, conducted webinars, and discussed how the strategy of the organization should be in the coming years if the situation continues for another couple

of years. We also had our virtual Board meeting to discuss the Covid-19 pandemic bringing their reflections back into our Board discussions. Since we would be living with the effects of Covid-19 for some time to come, the team should be geared up to any unprecedented situation. We also thank the Donors for having faith in us.

Combined with its strong leadership and abled field team, I am confident that the organization will be well-placed to go on delivering the project deliverables as per the Donors requirement while meeting the needs of the stakeholders.

Wishing all the best for the future.

About Partners in Prosperity

Vision

A healthy and prosperous planet, and people (HP³).

Mission

To sustainably alleviate poverty, build a healthy environment and secure livelihoods for all, in partnership with governments, communities, enterprises and other institutions.

Core Competency

- Backward and forward market linkage for farmers
- · Skills development of youth
- Food safety and security

Cross-Cutting Theme

- Gender equality
- Capacity building of farmer organisations

Aspirational Theme

- Blockchain technology for transaction at farms
- · Application of Al in farming
- Low cost public health services

Annual Report 2021 2

Support offered by PnP

- Create innovative business models and financial structures, towards inclusive market systems. PnP also specializes in building management and technical capacities of development professionals, institutions;
- PnP provides its expertise to Central & State governments, donors, humanitarian organizations, and corporate investors, alike. Strategic review and support for programme conceptualization, design, and planning;
- Project and portfolio management, implementation, monitoring and evaluation;
- Consulting Services and Thematic assessments;
- Policy analysis, Action Research and Knowledge management.

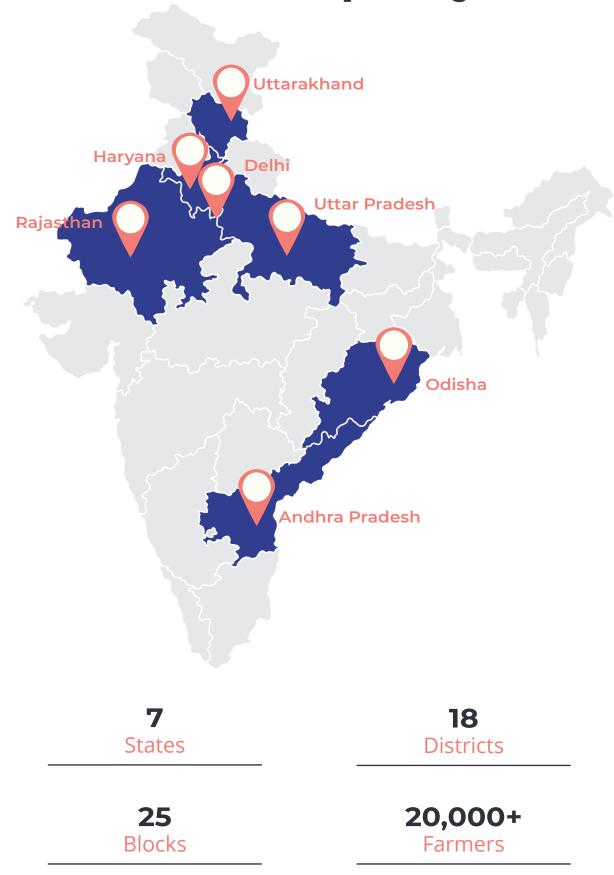

Accreditation/Membership

- PnP is accredited by Credibility Alliance under Minimum norms of NGO.
- We are a network member of Value Chain Network, Nutrition Coalition, Sustainable Rice Platform, and Climate Action Network (South Asia).
- We are a member of Alliance for Water Stewardship, UK.
- We are registered under CSR -1 (Registration no. CSR00009897) mandated by Registrar of Companies, Ministry of Corporate Affairs, Government of India.

Footprint of

Partners in Prosperity

Our Programmes

Chintapalli Tribal Organic Coffee Project

Chintapalli Tribal Organic Coffee Project (CTOCP) implemented as a pilot project in Paderu ITDA, Visakhapatnam agency area and supported by Andhra Pradesh Scheduled Tribes Cooperative Finance Corporation Limited (TRICOR), Government of Andhra Pradesh. The duration of the project is for three years (2018 October to September 2021).

Highlights during the year:

- Formation of Farmer Producer Groups (FPGs) (2020-21: Around 1002 (Chintapalli 696 and G K Veedhi 302) FPOs were formed during the financial year
- Aggregation of coffee was around 311.48 MT from Chintapalli and 347.01 MT from G K Veedhi Mandal. The coffee fruit was procured from 5,823 farmers from Chintapalli and 5,245 farmers from G K Veedhi. It was bought for Rs. 27/- per kg as per the decision of the Board members in the MACS BoD meeting.
- Eco pulping unit's operation had commenced this season. More than 1250 trainings have

- been organised for more than 10,000 farmers from both the mandals during the year despite COVID-19 by following COVID-19 protocols.
- be covered under this. The organic certification process for coffee growers has initiated and selected IMO Control as a certification agency by looking at European Market demand for the same. TATA Q Cert also selected as a second agency in order to capture domestic market potential and ensure documentation and inspection. We have registered 6 ICS (Internal control System) for 3000 farmers.

Our COVID-19 Response

A small gesture to the front line warriors

As COVID-19 gripped the world, India being one of the most vulnerable countries to the spread of the virus, went into a complete lockdown. In these times of crisis, several civil society organisations and individuals have stepped up to help those facing the brunt of this pandemic. In the first wave of pandemic, Partners in Prosperity, helped people in its project locations by providing medical equipment for hospital staff, and handed it over to the Chief Medical Officer at Haldwani during the first wave. In Chintapalli essential commodity kits containing staples for a household were distributed to poor farmers and daily-wage earners in villages like Lothugadda, Chintapalli, Yerrabommalu,

Pedaberada, Kommangi, Kothapalem and Lammasingi

In the second wave of pandemic, in Chintapalli COVID-19 safety kits (containing one face shield, one sanitiser, N-95 masks) were distributed to the Journalists in Chintapalli, Youth Training Centre staff and health workers working at for COVID-19 patient quarantine centres. We had also distributed dry ration to the farmers living in interior villages of Chintapalli. Apart from the above constant advisory solutions regarding COVID-19 guidelines and precautions to be followed were been given to the farmers and staff.

Water Productivity Project (WAPRO)

The Water Productivity Project commenced in Uttarakhand in January 2015. The first phase of the project was from the year 2015 to 2018 in Uttarakhand. The second phase (WAPRO II) started in the year 2019 along with an extension in Uttar Pradesh along with Uttarakhand. The core objective of the project is to enhance farming income and increase water productivity by applying a PUSH, PULL, POLICY.

Progress during the year

WAPRO phase II continues to build on the evidence gathered from field trials in Kharif and Rabi season and aims to seek policy-level interventions in agriculture practices, better market linkages and improved irrigation and water-related infrastructure in the states of Uttarakhand and Uttar Pradesh. The onset of the year was marked

by pandemic threats posed by COVID-19. The initial months looked gloomy till the project took a conscious decision of re-looking and strategically planning outcome-based activities in the region which would call for minimum group interactions and travel into fields.

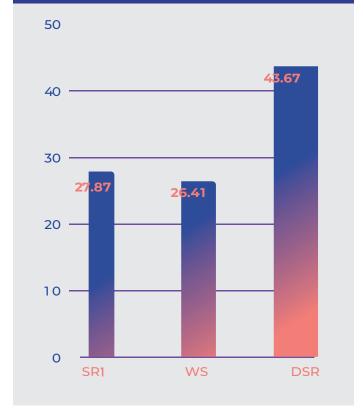

Push

- Total 2448 farmers were trained in the year 2020, of which 1463 are women participants.
- 77 extension staff were trained.
- 102 demonstrations on (System of Rice Intensification (SRI), Alternate Wetting and Drying (AWD), Direct Seeding of Rice (DSR), Wet Seeding (WS)) in Kharif and 110 demonstrations for line sowing of pulses and wheat taken.
- 2 Drip demonstration site set up in Uttar Pradesh.
- 07 Water Stewardship (WS) plans have been implemented in Uttarakhand.
- 1 reading material on Rabi demo result for the year 2019-20 was developed

Pull

We have ensured a Fairtrade premium of INR 1000 per MT to those farmers who have adopted SRI.

Water saving percentage in comparison to Conventional Farming

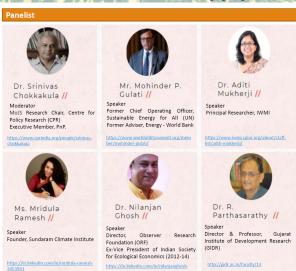

Policy

- Under Policy our role was to catalyse policy reform initiatives, enrich ongoing work, and meet critical gaps. Under this we,
 - Organised 4 webinars with private sector leaders, opinion makers, and think tanks as follows:
 - Incentives and Disincentives Groundwater Conservation- How to Bell the Cat? A Webinar -lointly organised by Indian Society of Ecological Economics (INSEE) and Partners in Prosperity (PnP) on 12 th September
 - Looming Water Crisis in India Challenges Ahead" A Daylong National e-Seminar was organised on 21 st Nov, 2020.
 - Webinar Impact of COVID on Maize and Tamarind Value Chain in Odisha, 17th December 2020
 - A half day meeting was organised with stakeholders on PnP's Water Policy Support Work in India on 21 st January.
 - Through our water policy work, we have demonstrated our strong convening power to gather decision makers, experts, and key stakeholders from the government, private sector and academia. At the request of Ministry of Jal Shakti, Government of India, prepared by policy briefs on National Ground Water Management Programme (NAQUIM) and Atal Bhujal Yojana (ABHY). We collaborated on two research projects. The focus of research by University of Utrecht is on responsible consumption of rice. The topic for research by University of Delhi was on air pollution in Delhi due to stubble burning in Punjab and Haryana. In collaboration with University of Chicago, another research project using Random Control Trial method to gauge the interest of small and marginal farmers on crop insurance is ongoing in Mahbubnagar of Telangana.

Incentives and Disincentives for Groundwater Conservation - How to Bell the Cat?

Saturday II 12th September 2020 II 4.00 pm- 6:00 pm IST Language- English II Platform: Zoom

Looming Water Crisis in India

with only **1120**всм utilisable water

4% of world's

fresh water

17% of world's population

groundwater is used for irrigation

Paradigm shifts needed

Participatory water management

Water governance decentralization by community involvement (women and children in particular) for water resource budgeting, monitoring and amangement should be supported with democratization of research data, which equips communities to make the decisions which are best for them.

Increased water usage efficiency

Government incentives focusing on efficient water consumption, and rewarding best practices in the agricultural sector. Industrial sector incentive programs which award exemplary work (community linked PPP) in water quality improvement and usage efficiency .

Smaller structures for water storage

A focus on mechanisms which enable artificial recharge of groundwater (where hydro-geologically feasible) and surface recharge, in water stressed areas is essential. Restoration, renovation and de-polluting of tanks, canals, lakes needs renewed focus!

Sustainable Organic Rice Project

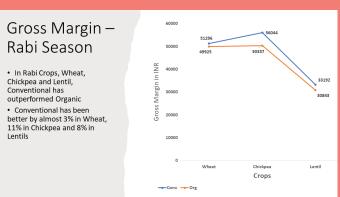

The purpose of this project is monitor and compare the performance of conventional and organic farms. For this purpose, PnP has been collecting data on cost of production and revenue earned by 100 farmers with equal representation of conventional and organic farms in Nainital district, Uttarakhand. The gross margin of organic farmers is 53% higher than that of conventional farmers. The higher earning by organic rice farmers is largely due to the buyback contract arrangements that the farmers have with private companies. Gross margin refers to farmer's net sales revenue minus its costs of goods sold (COGS). In other words it is the sales revenue a farmer retains after incurring the direct costs associated with producing the crops its sells.

PnP has initiated GPS-tagged soil mapping, testing and analysis of soil of all farmers included in gross margin analysis. With the synergistic approaches of other projects, the existing farmers are planned to be covered with soil mapping where the soil test will help the farmers of region to better plan their inputs based on soil health to further reduce the costs associated with farming and making farming sustainable. The youth trained under skill development projects spread across the region will also act as change agents with the skills and knowledge acquired on Organic farming.

PnP will strive to link farmers with appropriate markets where they can market their organic (rabi crop products). The current market linkage allows them to market Kharif products like Organic Basmati Rice only. The Organic Rabi crop products like wheat, chickpeas and lentils hardly have any upper edge when it comes to pricing and incentivization.

Vocational Skill Development of Youth in Nainital District, Uttarakhand, India

The salient feature of the project is to offer vulnerable young people in Uttarakhand and the long-term impact sought through training, internships and additional initiatives is that youth become leaders in their own sphere, and some become entrepreneurs.

The current set of activities of the VSD project is

aligned towards achieving the stated overall goal to offer young people opportunities for a successful future through training, coaching and exchange.

A notable feature of tractor training is that all participants are young adults. At the end of their trainings, all 80 candidates valid light motor vehicle licenses.

Total 556 participants trained in

Organic Farming Trainings

Biofloc Trainings

Agri-Entrepreneurship trainings

Tool Trainings

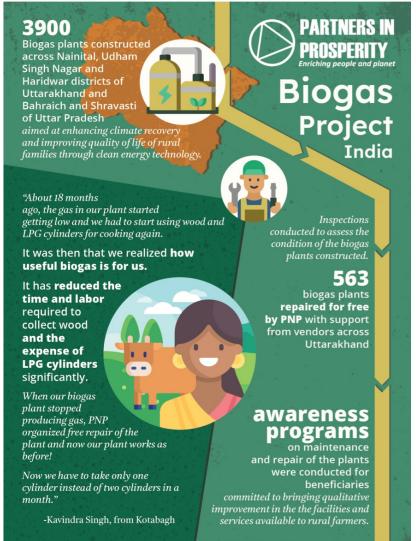

Tractor Trainings

Biogas India Project

Apart from the Biogas units construction, additional activities have been taken up as a part of Gold Standard Verified Emissions Reduction initiatives. Water infrastructure development related projects which suited the farmers were taken up during the year to maximise reach of irrigation water through channels, which raises their farm productivity and enhances their economic status too.

- An external evaluation of the Biogas Project was completed in January 2021. The report highlighted potential for large community-based biogas units.
- In order to improve the traceability and identification, a Beneficiary Identification card has been designed and distributed, as per the recommendations of Gold Standard Audit.
- To understand the implication and effectiveness of Slurry, soil samples for testing were also commissioned from the beneficiaries applying slurry-based manure on their fields.
- Gold Standard Audit for the period 2018-2019 conducted successfully, and verification report was approved. GS will issue 26,066 carbon credits for the project.
- Farmers with biogas units are being trained to manage the slurry to enhance crop productivity.
- Trainings offered to 130 biogas beneficiaries. This is a continuous activity
- Biogas user groups formed where WEGs don't exist and trained on O&M for better management of the biogas units.
- WhatsApp group of biogas beneficiaries has been created with for any technical assistance of the biogas unit. Operations and maintenance manual has also been developed and made available.

Other Projects and Studies

Scaling up Nutrition Sensitive Agriculture Interventions

SUNSAI - Scaling up Nutrition Sensitive Agriculture Interventions in Indian Himalayan Region supported by Welthungerhilfe India. The objective of the assignment was to increase production of local crops and consumption of nutritious food among the children from 0-6 years, Adolescent Girls, Pregnant Women and Lactating Mothers.

Value Chain Assessments

Supported by IFAD and Helvetas Swiss Intercooperation, conducted value chain assessments for selected value chains (Maize and Tamarind) and formulate recommendations for short and midterm level responses to mitigate negative impacts and contribute to recovery efforts. The study was undertaken in Odisha.

Household Survey and Design

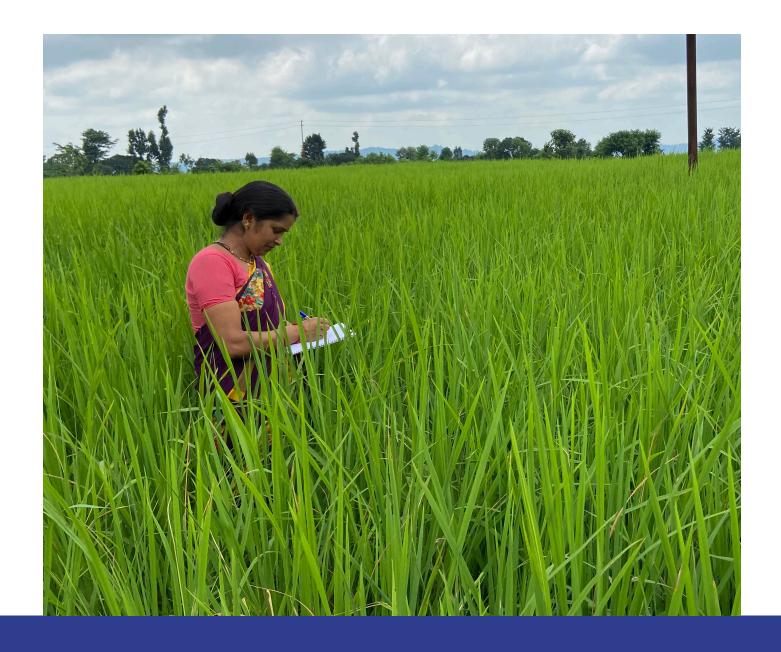

Conducting 400 Household Survey and Design of Crop Insurance in Mahbubnagar, Telangana supported by University of Chicago.

Scoping study for Water Recharge

Conducted a scoping study for Water Recharge in Sitarganj, Uttarakhand supported by Reckitt and Benckiser. The scope of the study was to create a thorough understanding of the surface and ground water resources of Sitarganj block. The emphasis was on ground water as the communities are increasingly depending on it directly and/or indirectly

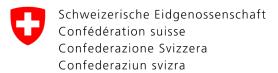

Way Forward

- Developing strategic partnerships with government, private agencies and corporate sectors to create sustainable models for livelihood prospects among local farmers.
- Promote farmer friendly Organic Certification and Standards.
- Helping farmer producer organisation to export organically produced cropls like coffee, cashew nuts, rice, and other products.

AUDITOR'S REPORT

- We have audited the attached Balance Sheet, Income and Expenditure Account of and Receipt and Payment account of PARTNERS IN PROSPERITY at 31st March, 2021.
- These financial statements are the responsibility of the Society Management. Our responsibility is to express an opinion on these financial statements based on our audit.
- We have conducted the audit in accordance with the auditing standards generally accepted in India. Those standards require that we plan and perform our audit to obtain a reasonable assurance about whether the financial statements are free from material misstatement. An audit also includes examining on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimate made by management as well as evaluating the overall financial statements presentation. We believe that our audit provides a reasonable basis for our opinion.

We report that:

Place: New Delhi

Date

: 16.07.2021

- We have obtained all the information and explanation which to the best of our knowledge, and belief, were necessary for the audit.
- In our opinion, proper books of account have been kept by the Association so far as it appears from our examination of those books.
- In our opinion and to the best of our information, and according to information given to us, the said accounts give a true and fair view:
 - in the case of the balance sheet, of the state of affairs of the above-named association as (i) at 31.03.2021,
 - in the case of the income and expenditure account, of the surplus for accounting year (ii) ending on 31.03.2021, and
 - in the case of receipt and payment account, of the receipts and payments for the (iii) accounting year ending on 31.03.2021

PARTNERS IN PROPSPERITY

Notes forming part of the financial statements

Note

Particulars

Society information

Partner in Prosperity is society registered under Societies Registration Act, 1860. The Society was incorporated on 20th October 1998. It is mainly engaged mainly in livelihood activities, education and training and to promote underprivileged people other social activities. Further the society is registered under section 12A of Income Tax Act, 1961 with effect from 06.02.2009.

6 Significant accounting policies and notes to account

6.1 Basis of accounting

The financial statements of the Society Company have been prepared under the historical cost convention in accordance with the Generally Accepted Accounting Principles in India. The accounting policies adopted in the preparation of the financial statements are consistent with those followed in the previous year.

The Society follows mercantile system of accounting and recognises significant items of income and expenditure on accrual basis. Wherever it is not possible to determine the quantum of accrual with reasonable certainty, the same is accounted for on cash basis.

6.2 Use of estimates

The preparation of financial statement in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amount of assets and liabilities on the date of financial statements. Actual results could differ from those estimates. Any revision to accounting estimates is recognized in future periods.

6.3 Revenue recognition

- a) Grant received for a specific purpose, are recognised as income to the extent of expenditure incurred during the year.
- b) Revenue from consultancy contracts is recognised as per term of agreement of each contract.

Other income

Interest income is accounted on accrual basis.

6.4 Fixed assets

Fixed assets are carried at cost less accumulated depreciation and impairment losses, if any. The cost of fixed assets includes interest on borrowings attributable to acquisition of qualifying fixed assets up to the date the asset is ready for its intended use and other incidental expenses incurred up to that date.

6.5 Depreciation

Depreciation has been charged at the rate prescribed in Income Tax Act.

Mandita Ray

6.6 Assets purchased out of grants received for a specific purpose are expensed in the year of purchase.

6.7 Foreign currency transactions

Transactions in foreign currency are recorded at the exchange rate prevailing at the date of the transaction. Monetary items denominated in foreign currency are restated at the year end exchange rates. Resultant exchange differences arising on settlement of transactions and/or restatements are recognized as Income or Expense in the year.

6.8 Taxes

The society is a not for profit organization engaged mainly in livelihood activities, education and training and to promote underprivileged people other social activities and the society is registered under Section 12A of the Income Tax Act, 1961.

The management believes that the activities of the society are covered within the definition of the charitable purpose as defined in section 2(15) of the Income tax Act, 1961 and accordingly the society has not provided for tax in the current year.

6.9 Provisions and contingencies

Provisions are recognized when the Society has a present obligation as a result of past events for which it is probable that an outflow of resources will be required to settle the obligation and a reliable estimate can be made. Provision required settling the obligation are reviewed regularly and are adjusted where necessary to reflect the current best estimate of the obligation.

- 6.10 The outstanding balances of creditors, loans and other advances given to the parties are subject to confirmations and therefore; these balances are stated as per books of accounts only. The management has however, scrutinized these accounts and believes that no material adjustment will be necessary upon the receipt of confirmations.
- 6.11 Information required to be disclosed under the Micro, Small and Medium Enterprises Development Act, 2006 has been determined to the extent such parties have been identified on the basis of information available with the Company. As represented by the management there are no Micro, Small and Medium enterprises to whom the Company owes dues, which are outstanding for more than 45 days as at March 31, 2021.

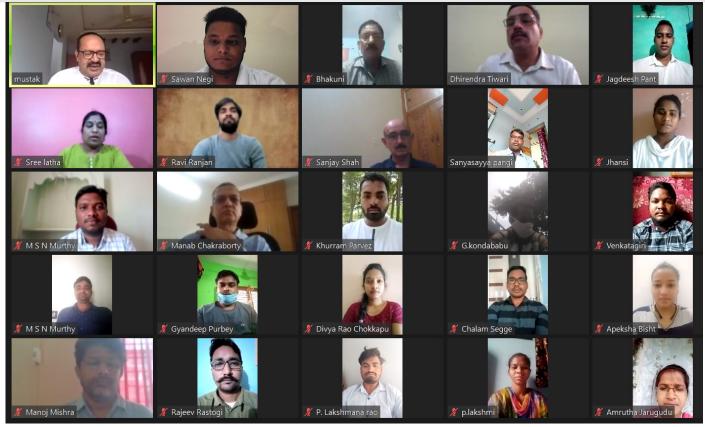

6/12 Contingent Liabilities (to the extent not provided for) - Nil.
